

7 REASONS YOUR CPA FIRM NEEDS SECURE FILE-SHARING AND ONE-CLICK E-SIGNATURES

You may think your small accounting firm is safe from hackers, but a whopping [43% of cyber attacks target small businesses](#). Here's 7 reasons why you should beef up your CPA firm's protection with secure file sharing and one-click e-signatures.

Secure file sharing

1 Protects your clients' financial information.

The right software can offer bank-level security for documents both in transit and at rest.

2 Saves you time.

When you share a paper file, you have to fill out it, staple it, mail it, and then wait for it to arrive. Sharing secure documents via email means that you can get documents to your clients in minutes, rather than hours.

3 Saves you money.

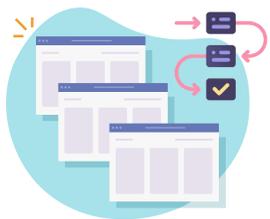

Your admin assistants are freed up to do the work that actually matters to your firm, like helping clients or improving business development.

4 Secure file sharing and one-click e-signatures make it easier for your clients to work with you.

Your clients no longer have to drive to your office to sign or worry about mailing a document on time. With secure e-signatures, clients can sign documents and send them back from anywhere.

One-click e-signatures

5 Create smoother workflows

Your employees no longer have to waste time hunting down clients just to get a signature.

6 Reduce signing errors

E-signatures restrict your client to sign only in certain areas, so they won't miss a signature or initial the first time around.

7 Legally binding

An e-signature is legally binding as long as:

- The signer's identity can be confirmed using a digital marker such as an IP address.
- The parameters of the transaction are clear and the signer undeniably intended to undergo the method of signing.
- The signature associated with the document is verifiable and has evidentiary documentation.

MangoShare offers secure file sharing and one-click e-signature tools designed specifically for accountants, by accountants. [Schedule a demo](#) and get started today.
